

- Transport pathway for water and weakly adsorbing substances
- Dominating transport pathway for water and weakly adsorbing substances
- Orain pipe
- Macropores/biopores
- Water filled part of a macropores/biopores
- Fractures/biopores/pores generated due to soil tillage
- Old desiccation fractures/ glaciotectonic fractures
- Fractures below the calcareous boundary being connected to a biopore
- Horizon with e.g. desiccation fractures
